

## Online Backup for Businesses

### Affordable, Easy-to-Use Backup for Multi-User Environments

#### The Mozy Advantage

##### Simple

Manage multi-user environments from the convenience of a web-based administrative console.

##### Secure

Mozy employs the highest security standards and stores your data in world-class data centers.

##### Affordable

Backup solutions start at less than \$5 per month, with no setup fees, no hardware to purchase, and little management required.

#### Professional Support

As a MozyPro customer, you'll receive 24/7/365 technical support. Mozy's expert technicians are available via phone, email, and chat to assist you with your data backup and restore needs.

#### Online Backup Made Simple

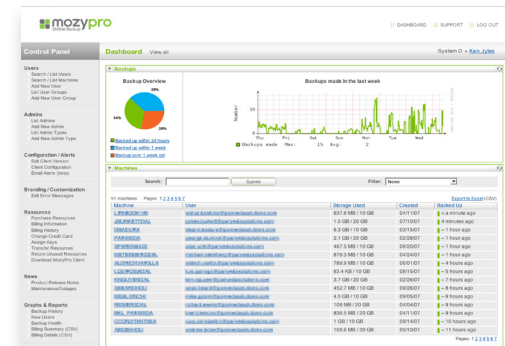

As a business professional, you know the importance of keeping your data, financials, and administrative materials safe. Yet the critical task of data backup can be an expensive and challenging endeavor as digital data continues to grow. You don't have time for backup solutions that take months to set up, require thousands of dollars in hardware costs, and force you to hire someone to oversee it all.

Mozy, the trusted leader in online backup, saves you time and money with simple, secure, and affordable backup solutions that allow you to focus on your business' future. You can be up and running in no time, as Mozy gives you the flexibility to deploy and manage multi-user environments from the convenience of a single administrative console.

#### With MozyPro, You'll Get The Tools You Need to Take Control

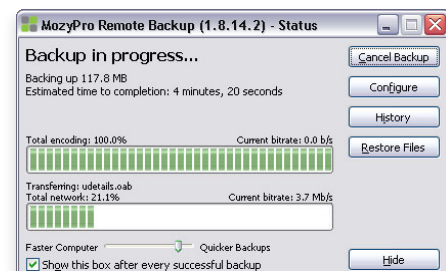

**MozyPro's web-based Administrative Console allows you to:**

- Create sub-administrators
- View individual or aggregate account usage, history, and stats
- Reset account passwords
- Change account status
- View and distribute license keys
- Customize individual and group configuration settings

**Through the MozyPro software application users can:**

- Select folders and files to back up
- Set automatic and scheduled backups
- See a history of all backups
- Configure options and set bandwidth throttling
- Restore files and folders

# MozyPro Feature Set

## Security

### ■ Encryption

- **Blowfish:** At the beginning of the backup process, all files are locally encrypted with 448-bit Blowfish encryption.
- **AES:** MozyPro users have the option of supplying a personal key utilizing military-grade 256-bit AES encryption en lieu of 448-bit Blowfish encryption.
- **SSL:** These encrypted files are then sent via 128-bit SSL—the same encryption used in online banking—to a Decho-managed data center where they remain in their encrypted state.

■ **Data centers:** All data centers employ state-of-the-art security and are SAS70 certified.

■ **Near Continuous Data Protection:** Mozy automatically detects and backs up new and changed files.

■ **Alerts:** Administrators may create customized email alerts regarding the backup health of their account to be sent to their email address on a daily, weekly, or, monthly basis.

---

## Ease of Use

■ **Automatic or scheduled backups:** Tell MozyPro when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.

■ **Block-level incremental backups:** After the initial backup, Mozy only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.

■ **Bandwidth throttling:** Users can determine how much bandwidth they want to dedicate to their backups so other high- priority services can run unimpeded.

■ **Multiple restore options:** Users and administrators can restore data via the Mozy software client, through the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through the Mozy Virtual Drive.

---

## Platform and File Support

■ **Version (snapshot) support:** Restore file versions up to 30 days in the past.

■ **SQL, Exchange, and network drive support:** Mozy backs up common business applications running on Windows servers.

■ **Windows and Mac support:** MozyPro supports Windows (2000, XP, 2003, and Vista, including servers) and Mac OS X (10.4 and 10.5, desktop and server) operating systems.

■ **Open and locked file support:** MozyPro backs up all open and locked files, including Outlook PST files.
